

Race Team Edition

NEW GENERATION OF SLALOM BOOM

After a full year of testing and hard work is a pleasure for us to present our new creation RTE a pride of AL 360 manufacture. A lightweight , thanks to the 100 % carbon construction using the best fibers and resins on the world market ; and with completely redesigned ergonomic curves , to provide maximum comfort without forgetting the importance of leaving the sail free to express his maximum power .

With classical oval section by AL 360 and diameters reduced to 28.5 cm ; for a better grip of the hand as well as a considerable reduction of effort in load of the tendons of the forearms. New look of the graphic grip.

Code	Model	Size	Weight	Curve	Diam.	Back-end
RTE-SL-180	Slalom	180-230	2,7 Kg	49 cm	28.5 mm	standard
RTE-SL-190	Slalom	190-245	2,85 Kg	49 cm	28.5 mm	standard
RTE-SL-200	Slalom - Race	200-260	3 Kg	49 cm	28.5 mm	standard

LEGEND

- white, new RTE
- red line, E3 slalom

What changes in the new RTE slalom boom, compared to E3 slalom standard

- center of gravity moved back, to better balance the equipment.
- wider and long curve to allow for complete freedom at the sail
- diameter 28.5 in the area of the hands, compared to E3 Slalom boom with a diameter 29.5.
- lightest from the E3 Slalom
